Description

The level temperature regulator, type NR 70 - MA designed for container installation, is a contact less electromagnetic switch serving for continuous teletransmission of liquid levels and temperature. Via cables of any length, level and temperature can be continuously evaluated for automatic control and display. The level controller contains a resistance measuring chain and a Pt100 resistor. The level and temperature dependent signal is converted in the integrated measuring transducer into a linear current change of 4-20mA. Optionally fixed mounted bistable level contacts can be installed additionally.

The level controller is maintenance-free when nondeposit media are used.

The device must only be installed by specialists.

**Max. viscosity SR 40 / SR 45 - 320mm²/S

Technical data

Switching tube	Brass or stainless steel max.L = 2000mm
Connection flange	Polyamide or stainless steel with flat seal
Nominal pressure	1 bar max. - float Hard-PU SR40 / SR45
Operating voltage	10 bar max. - float, Flange stainless steel VR50
Measuring range	12V ... 30V DC
Thermal element	4-20 mA = 0-100 °C
Contact pitch	Pt100
Load	7,5 mm RB = U-12V 20mA
Mounting position	vertical ± 30°
